Technical Skills

Languages: Java, JavaScript, TypeScript, SQL
Backend: Spring Boot, Node.js, Express.js, REST APIs
Frontend: React.js, Next.js, Tailwind CSS, Ember.js
Database: MySQL, MongoDB
Version Control/Tools: Git, Github, Docker, Postman, Jira
Others: OOP Concepts, Collections, Exception Handling, Multithreading, API Development, CRUD Operations, Database Integration, Authentication and Authorization, Component-Driven Development, Data Structures, Accessibility (A11y)

Experience

Raja Software Labs Pvt. Ltd **Jan 2026 - Sep 2026**
Software Engineer *Pune*

- Developed and maintained RESTful APIs and backend business logic using Spring Boot, with database integration to support core application functionality.
- Built and maintained React.js features, integrating the frontend with backend services and APIs to deliver complete end-to-end functionality.
- Removed **10K+** lines of redundant code and extracted shared modules and improving reusability across teams.
- Resolved **100+** WCAG A11y issues across desktop web, mobile web, and Android/iOS webviews, bringing multiple pages to full AA compliance.
- Analysed functional and client-reported issues, identified root causes, and collaborated with cross-functional teams to implement reliable and maintainable frontend and backend solutions.

Sunshine Powertronics **Oct 2025 – Jan 2026**
Software Engineer *Pune*

- Developed full-stack web applications using Java, Spring Boot, Node.js, Express.js, React.js, REST APIs, and databases.
- Developed backend functionality and API integrations to support application features and frontend workflows.
- Implemented database operations and application business logic for web applications.
- Built reusable and maintainable features following software engineering and Git-based development practices.
- Tested and debugged APIs using Postman and resolved application issues across frontend and backend components.

Tata Motors **Nov 2021 – Nov 2022**
Diploma Apprentice Trainee *Pune*

- Used SAP for production-related activities, including vehicle status tracking and dispatch reporting.
- Prepared and maintained production, quality, and audit documentation supporting targets and DIFTR.

Projects

Online Assessment Platform for Hiring Process

- Developed a full-stack online assessment platform supporting timed assessments, automated evaluation, and copy-paste prevention.
- Developed backend functionality for assessment management, user session, test submission, and automated evaluation.
- Designed MongoDB collections for users, assessments, questions, responses, and results using Spring Data MongoDB.
- Developed an admin analytics dashboard for monitoring assessment and candidate-related data.
- **Tools and Technologies:** Java, Spring Boot, React.js, MongoDB, Tailwind CSS, shadcn/ui, GitHub

Sunshine Powertronics Visit

- Developed a responsive company website with product showcase and integrated communication features.
- Developed backend functionality using Express.js and integrated database operations using MongoDB.
- Implemented API-based communication between application components and backend services, integrating email functionality to support customer enquiries.
- **Tools and Technologies:** React.js, Express.js, MongoDB, Tailwind CSS, Mantine, Email js, VS Code, Github

Education

Government College of Engineering and Research, Pune **Nov 2022 – May 2025**
Bachelor of Engineering in Computer Engineering

Government Polytechnic, Kolhapur **Aug 2018 – May 2021**
Diploma in Electrical Engineering
